

The ACA Advantage

ACA is a recognized leader in data management, reporting and consulting to the behavioral health and human services sector.

We've built our reputation on a comprehensive understanding of the challenges facing Counties, Behavioral Health Managed Care Organizations and Government Agencies as they navigate a myriad of programmatic rules and regulations.

ACA offers a full range of HIPAA compliant data management, technical and consulting solutions to transform complex requirements into the simple, integrated processes and data tools on which our clients rely.

And, we pride ourselves on building strong, collaborative relationships to ensure that our products and services meet the unique needs of each client.

Our Products ...

ACA's expertise in data validation and warehousing provides the foundation for our MASTRR™ Solutions suite of reports and our Online Analytical Processing (OLAP) capacity. These products give our clients the flexibility to analyze and report their critical information in a variety of ways, at both an aggregate and detail level.

Our Services ...

Data Management

Overwhelmed with data? Don't pull your hair out. ACA is a recognized leader in Pennsylvania for the cleansing, validation, translation and maintenance of behavioral healthcare data.

HIPAA Compliance

Keeping abreast of current HIPAA rules and requirements is critical. At ACA, we keep our clients up to date about health data privacy and security issues, and we provide comprehensive training and consultation to help them maintain compliance.

Technical Support

At ACA, we tailor our technical support services to help our clients maximize their funds while operating under the budgetary constraints of County, State and Governmental Authorities.

Consulting

Our clients value our depth of experience in public health care planning. When new State and Federal initiatives introduce unexpected program challenges for our clients, we partner with them to come up with the solutions they need.
